

# CDC 6964

Stronger Roots, Higher Yields,  
UNMATCHED PERFORMANCE.

Regional variety trials reveal exciting results for CDC 6964, showcasing yields comparable to CDC Jimini in Zones 1 and 2 and an impressive 12% increase in Zones 3 and 4. Even more remarkable, it outperforms CDC Invincible with an approximate 30% yield improvement. Field observations highlight its superior root rot resistance, likely driving these outstanding yield gains. Additionally, this variety boasts improved seed coat retention and standability compared to CDC Jimini, setting a new benchmark in performance.

A field image from this year (Figure 1) illustrates its exceptional potential in real-world conditions

Figure 1: In-field photograph comparing CDC 6964 vs. CDC Jimini on July 12th 2024.

## Agronomic Benefits

### Yield Potential:

Outperforms market checks and leading varieties

### Standability:

Improved standability compared to CDC Jimini

### Seed Quality:

Improved seed coat retention compared to CDC Jimini

## Disease Resistance

### Strengths:

- Improved root rot resistance compared to CDC Jimini (Figure 1)

### Neutral:

- Similar resistance to Ascochyta and Anthracnose as CDC Invincible

YIELD	Zone 1 & 2 comparable to CDC Jimini Zone 3 & 4 112% of CDC Jimini 132% of check CDC Invincible
MATURITY	-1 day of CDC Jimini and CDC Invincible
HEIGHT	-4 cm of CDC Jimini
SEED SIZE & THICKNESS	Equal to CDC Invincible
COTYLEDON & SEED COAT COLOUR	Similar to CDC Invincible

## Where to Get CDC 6964

### Name

Fraser Farms Ltd  
LL Seeds  
Mercer Seeds Ltd  
Petric Seeds  
Simpson Seeds Inc  
Veikle Agro Inc.  
Wylie Seeds

### Town

Pambrun, Sask.  
Lumsden, Sask.  
Lethbridge County, Alta.  
Avonlea, Sask.  
Moose Jaw, Sask.  
Cut Knife, Sask.  
Biggar, Sask.

### Phone

1.306.741.0475
